"Glad Gossip," 10 Cents

"Glad Gossip" is a 24-page booklet I wrote to help both amateurs and professional growers get the most pleasure and profit from their Glads. Doesn't tell all there is to know about Glads, but tips you off about many points of vital interest.

Among other things, about eight pages are given to **thrips**. Many who followed my suggestions last season solved their thrips problems, and have renewed their enthusiasm for growing Glads as a hobby or for market.

The price is 10 cents. If not worth 10 cents then it isn't worth sending for. It's been worth dollars to many Glad growers. You'll be surprised.

Free with Glad orders amounting to 50c or over, if asked for when order is sent. Otherwise, 10c please.

ALL GLADS IN THESE TWO COLUMNS PRICED PREPAID

A Super Glad "New Zealand Splendor"

(Originated by W. R. Toon, New Zealand)
Probably the best Glad introduced into U. S. from New Zealand.

The plant and spike sturdy and strong. Blooms large. Many open. A crooked spike or misplaced bloom "very unusual".

The color is medium pink, with throat blotch of orange-scarlet. The shade varies somewhat, depending on soil and weather.

The florets set close to the spike, and are well faced and spaced. They look you right in the eye.

Daffodil Bulbs

Glorious Giant King Alfred

Said by many to be the largest and grandest of all Trumpet Daffodils.

Both trumpet (which is charmingly frilled) and petals are deep rich yellow. A giant bold flower. Stems long and strong. Healthy grower.

This year we offer just one variety in Daffodils, the best—"King Alfred".

Solid, disease free, sure-to-bloom bulbs, that once planted will prove a splendid investment, for they will last, increase, and bloom for years.

In Daffodils, this year, we suggest you "Buy the Best—Forget the Rest". Use for garden or blooming in plots.

Prices, prepaid in U.S.A. Each 15c; 3 for 40c; 5 for 65c; 10 for \$1.25; 25 for \$2.90; 100 for \$11.00.

For indoors only. Will bloom in soil or water. Not the inferior "bargain bulbs" but strong, matured, blooming bulbs. 3 for 25c; 5 for 35c; 10 for 65c; 25 for \$1.50. Prepaid.

A FEW IRIS POINTERS

If plant Iris late in fall, then cover plants with brush, cornstalks, tomato vines, excelsior, or any coarse material until early spring. This is to prevent alternate freezing and thawing in winter.

I usually protect my late Iris plantings simply by throwing a ridge of soil over the rows with a small hand plow, shovel or hoe, covering everything. In this case I cut the tops back nearly to the rhizomes, planting more like bulbs than plants. Very important to pack soil firmly about the roots and see that they enter the winter in the soil not dried out, though much moisture not needed or desirable. Level the soil early in spring.

"Zebra" Iris

(Pallida Dalmatica Folius Variegata)

Has lovely blue flowers in season. But its special charm and value is in the plant itself. The unique leaves, green striped white, are so tough and stiff that they remain erect from early spring until way late in fall.

For quick and pleasing effect, plant in clumps, colonies or rows. (Fine for Rock Gardens also).
